

HAWAAN FOREST ESTATE WEBSITE IS NOW LIVE

<https://hawaanforestestate.co.za/>

We are pleased to announce the launch of the Hawaan Forest Estate Website which has been a collaborative project with Gill Balfour from Stone Hut Designs and a Project Team comprising of John Gatherer, Devan Munien, Charles Sturgess & Malani Reddy.

The goal was to create a new integrated website to showcase Hawaan Forest Estate as one of Kwa Zulu Natal's premier eco estates, situated in Umhlanga and to develop and operate a website that is user friendly, modern in approach, containing useful and interesting updates, informative blogs and articles, impressive photography of the properties, fauna and flora, bird life and walking trails.

A Homeowners page has been created for the Hawaan Residents which is password protected and includes the Estates Rules & Regulations, Policies & Procedures, Guidelines & Orientation, MOI, Conservation Trust Deed, & Site Map of the Estate.

We would be very keen to have any contributions from the Residents on fauna & flora and our beautiful Forest & Grasslands environment.

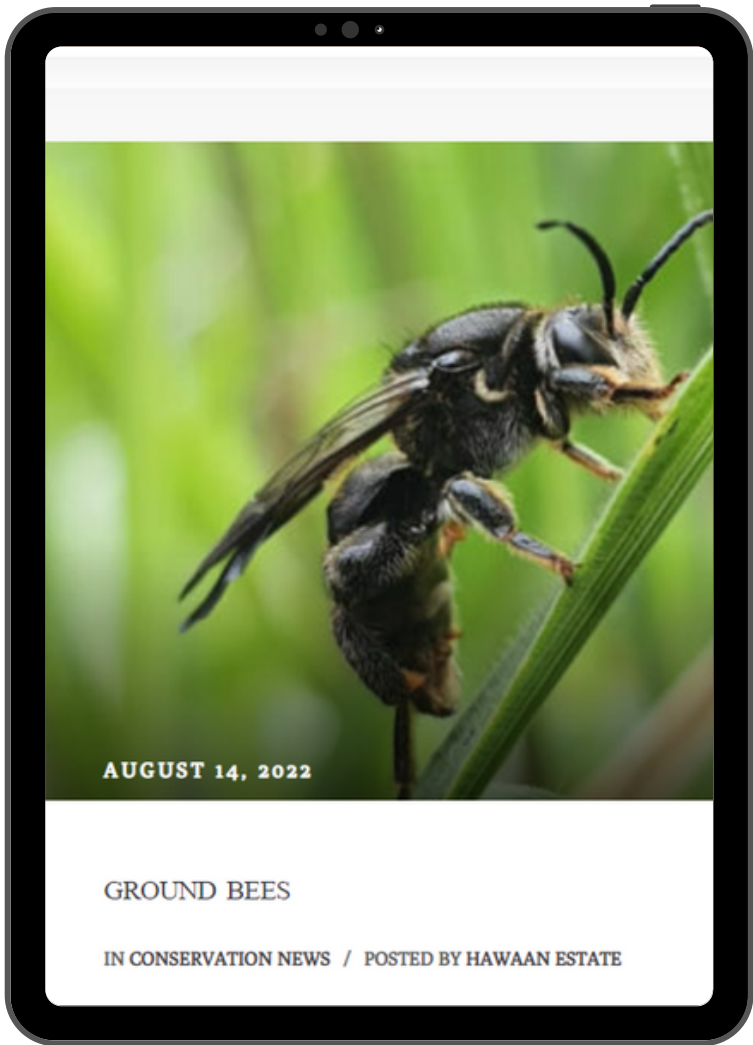

Malani Reddy will be the Website Administrator for any future updates, images, articles and all submissions will be reviewed by the project team, acting as the Quality Assurance.

We would like to take the opportunity of thanking Devan Munien, John Gatherer, Allister Starke, Leigh & Terri Mann, Pat Goss, Pat Naicker, Caley Rosenberg & Sahil Sewpersad for their contributions to the website.
